

## **MAIN THEME OF THE MEETING**

Many national authorities and experts are dealing with several kinds of geographical names, collecting and maintaining geographical names data. Regarding the aimed avoidance of more than one name for one feature, the exonyms still cause problems in both national and international communication. The aim of the meeting will be focused on researching into the results or possibilities to reduce the using of exonyms.

There are many points to be discussed, a. o.:

- Criteria for the terminological division of exonyms;
- Criteria for the use of exonyms;
- Differences in the usage of exonyms depending on the level of communication;
- Methodological criteria used by the preparation for the national lists of exonyms.
