

ADDITIONAL POINTS FOR DISCUSION ON WG MEETING

Helen Kerfoot (president of UNGEGN) and Paul Woodman (United Kingdom) have been helping with the creation of additional points and topics of the meeting which can be structured as follows:

1 A WORK PLAN for the next Session and Conference, tackling the UN resolutions we have already got. I have tried to distil these resolutions into one composite statement, to see in a nutshell where we are as regards our aim. Such a statement might read: "Prepare and publish lists of exonyms, perhaps divided into categories, with a view to the reduction of exonyms over time. Where exonyms remain necessary, they should be shown subordinately to the appropriate endonyms."

2 A WEBSITE for the Working Group. Other WGs are developing these, and we probably ought to do the same.

3 INTERNET INFORMATION and discussion forum.

4 The TOPONYMIC DATABASE. This is the recent UNGIWG plan for UNGEGN to develop a database suitable for all UN departments.

5 REPORTS for the Newsletter and the next Session.

6 OTHER TOPYCS.
